                                20040309
     This invention relates to novel triple salts of (-)-hydroxycitric
     acid having the general formula 1 wherein X, Y are selected from
     zinc or group IIA metal and Z is selected from group IA metals of the
     Periodic Table. Preferred salts are triple metal salts of calcium,
     magnesium or zinc and potassium. This invention also includes a process
     for preparing the triple salts by adding stiochiometric amts. of aqueous solns.
     of the compds. of the desired metal to an aqueous solution of (-)-HCA.
     Preferably an extract from Garcinia fruit ring is used as a starting
     material. Compds. of this invention are substantially tasteless, odorless
     and highly water soluble and find use in beverages and in neutraceuticals.
